Henry Larrymore Foundry IQ Badge Request

IMPORTANT: We issue badges from the [Global AI Community](#). Please ensure you have [signed up for an account](#) to view your badge. After you submit your issue, please submit this [form](#) to initiate your badge request. This step is required as we cannot issue a badge without it. Failure to fill out the required screenshots, inputs or badge form will result in the issue being closed.

Curriculum Completion Validation

Please check this to confirm that you have completed all 3 Foundry IQ episode cookbooks.

☐ I verify that I have completed all 3 Foundry IQ episode cookbooks end-to-end. *

Episode completion proof

For each episode: fork the repo, run all notebook cells, and commit the notebook with outputs saved. Paste the direct link to your forked notebook. Screenshots must show your final cell output with your GitHub username or Azure resource name visible.

Ep 1 — Unlocking Knowledge for Agents: solution verification

Please upload a screenshot of your final notebook output for Episode 1 into the field below.

☐ I verify that I have uploaded a screenshot of my Episode 1 final notebook output with my GitHub username or Azure resource name shown into the field below. *

Ep 1 — fork URL *

Paste the link to your forked notebook with committed cell outputs.

Ep1-Instead of allowing AI to hallucinate, or leaving large logical gaps that it might have to fill-in, we can give it a "brain" with semantics-infused knowledge. And, thought it would have taken much more time, it's clear how important chunking correctly is!

Ep2-"Omni-channel sourcing"...obtaining data from a broad/well-rounded ranged of data set increases user confidence and can decrease guessing, and initial perceptions of bias, with relevance baked-in.

Ep3-I liked the fact that we can throttle the reasoning capabilities, which I actually see in my various vibe coding solutions! As well as the versatility of MCP, while some companies (and articles) are beginning to shy away from MCP IRL.

Challenges or feedback

Any blockers or steps that need clearer documentation? This helps us improve the cookbooks.

The change over from 4o-mini to other models was a little tough. But, I managed.
